ID RECOGNITION & VISITOR MANAGEMENT

About SignMe

Since 2009, SignMe Has been redefining identity and security with AI-powered innovation. With more than 1,000 successful installations, it has become a trusted solution for enterprises and governments. It reads National IDs, driver's licenses, Car licenses and passports with up to 100% Accuracy. In just seconds, SignMe transforms IDs into digital data ready to use across your systems. Beyond verification, it powers visitor management with a decade of proven success.

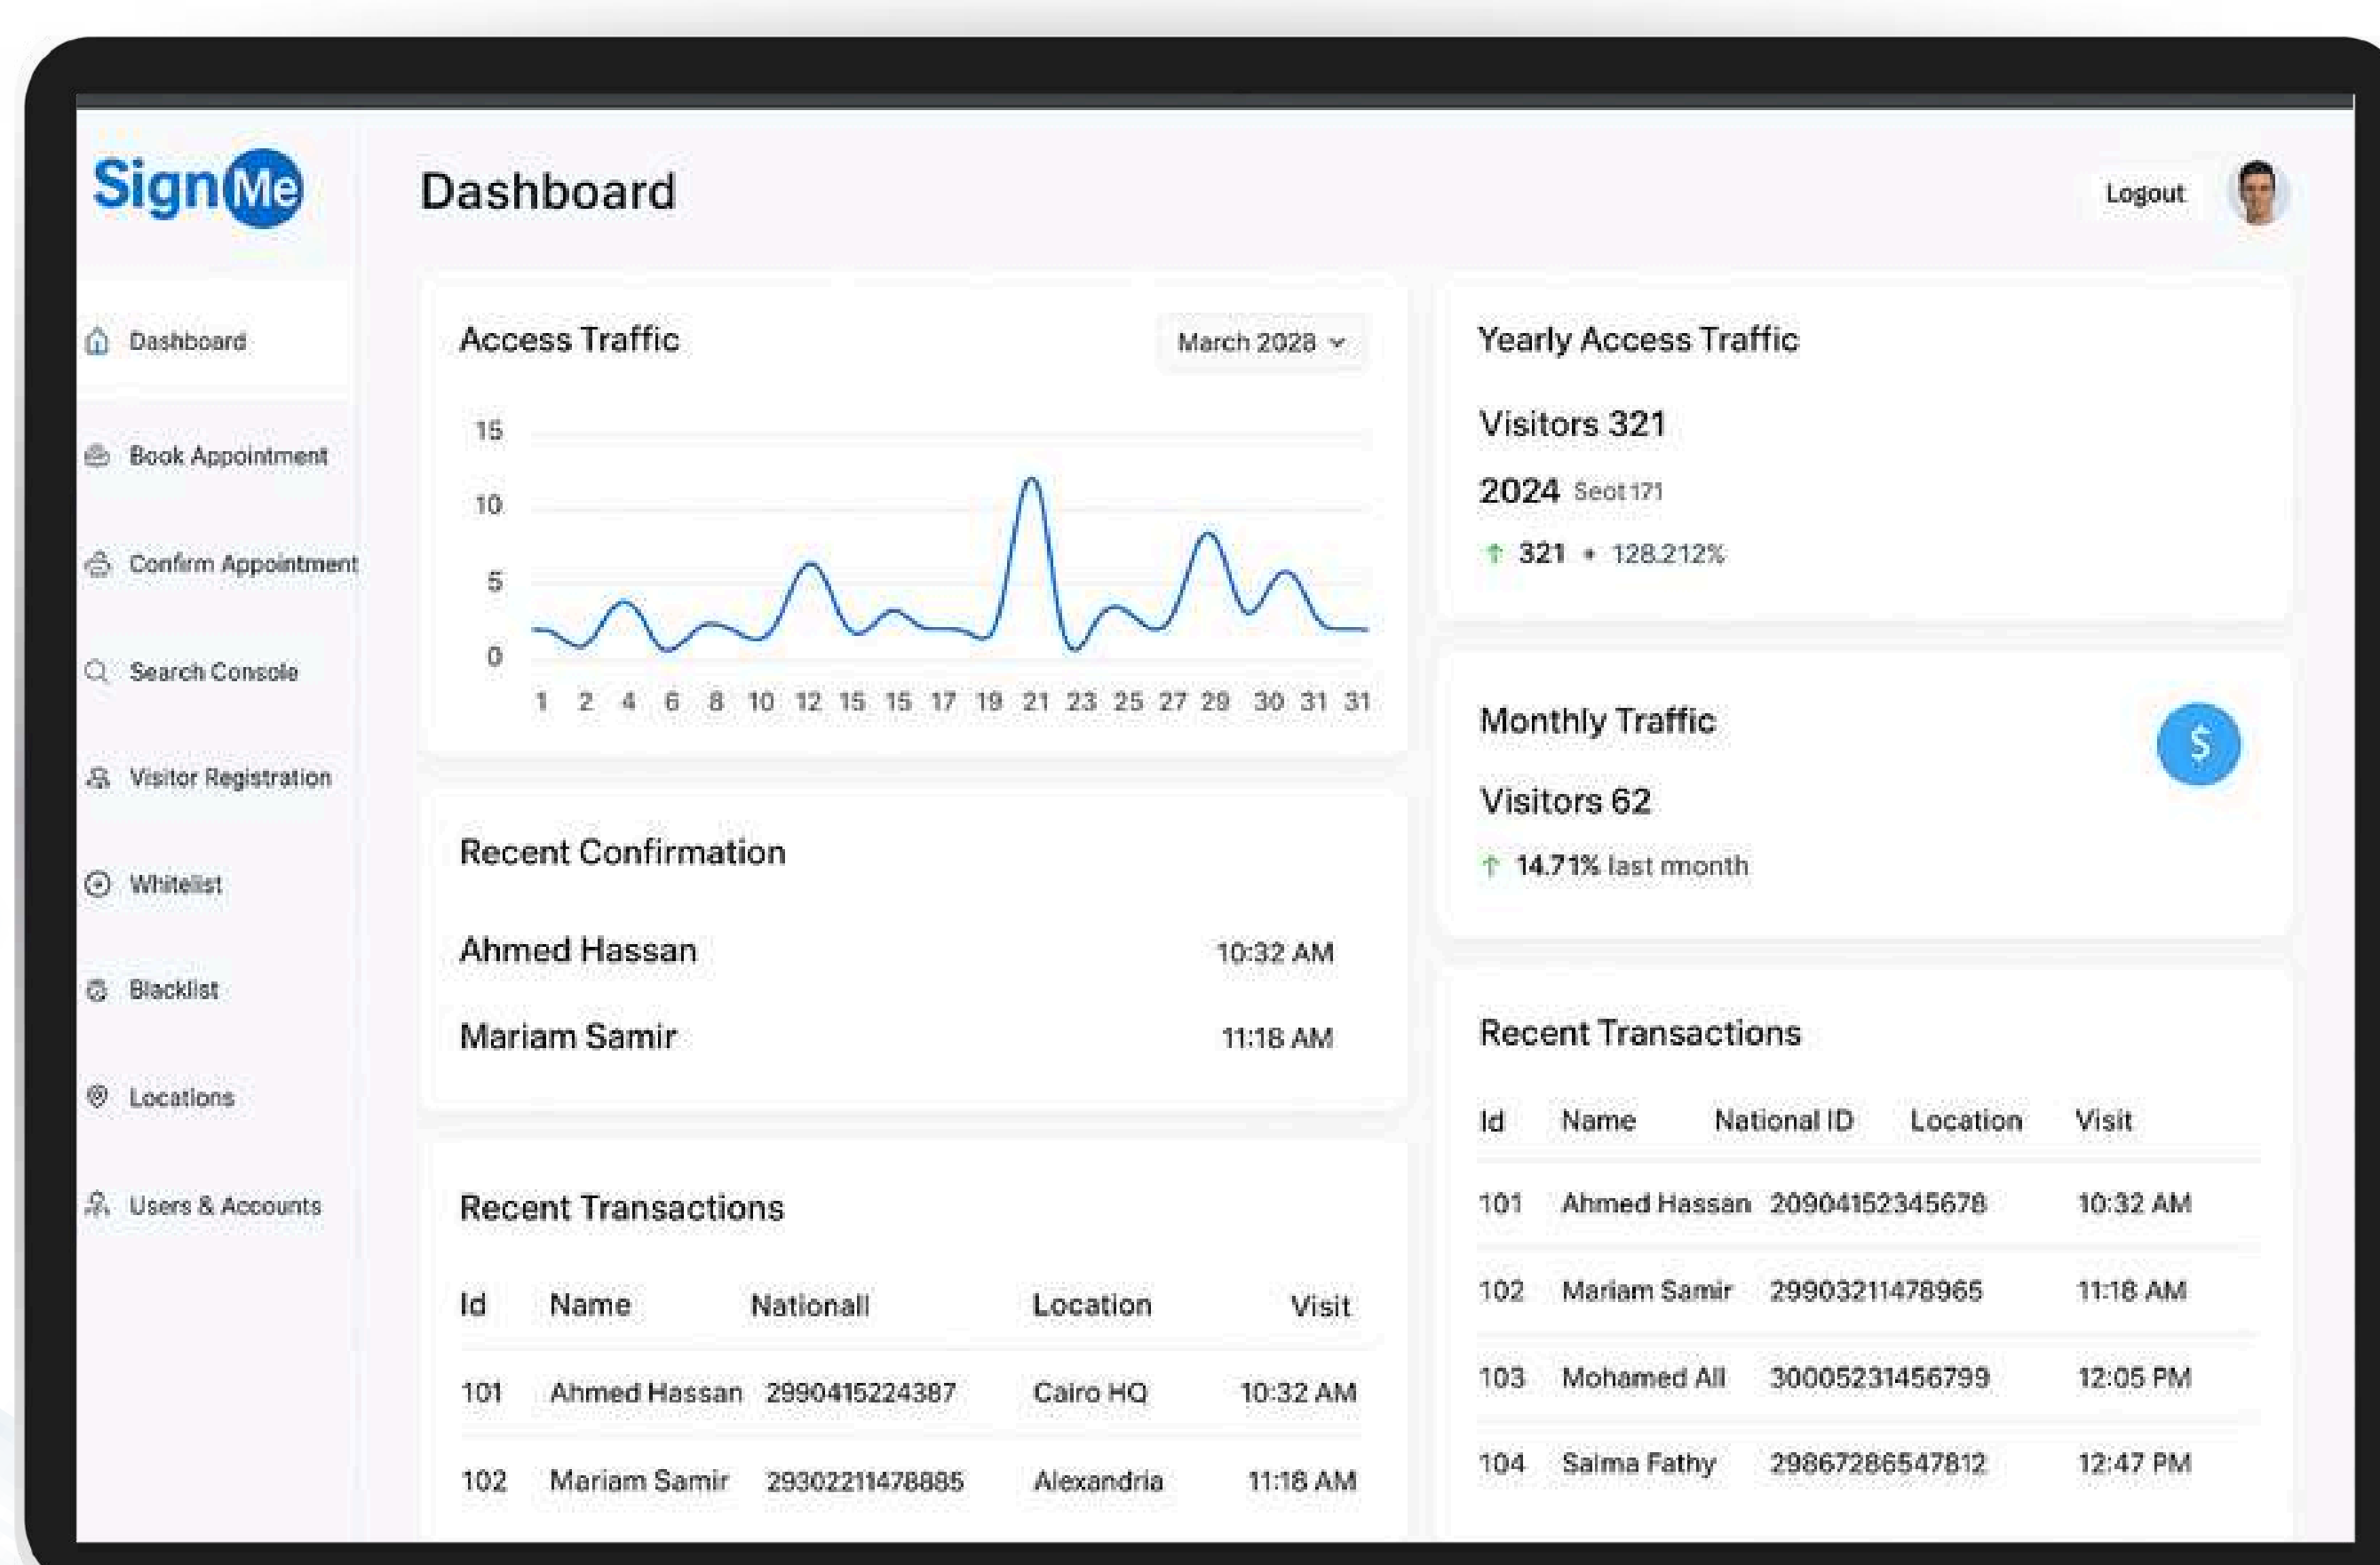

From One ID to Everything

With just a single ID scan, SignMe instantly extracts data, creates a visitor profile, and unlocks multiple features like check-in/out, time attendance, access control, and reports.

Smart Data, Zero Effort

No typing, no delays. SignMe transforms one ID into complete, actionable information that empowers security, efficiency, and smarter management.

Just one ID input .. many outputs

Personnel & Visitor Management System

SignMe is an advanced, all-in-one platform designed to manage visitors and employees with speed, accuracy, and security. It digitizes the entire check-in/out process by scanning IDs, passports, and driver's licenses, capturing visitor profiles, and generating smart access records. With SignMe, organizations can streamline entry, strengthen security, and improve reporting — all from interface accessible anytime.

Smart Feature List for SignMe

 AI-Powered OCR	 Photo Capture	 Whitelist & Blacklist
 Easy Check-In/Out	 Printable & Virtual IDs 	 Notifications & Alerts
 Visitor Profiles	 Access Control & LPR	 NID PDF417 Barcode 

How Each Feature Helps You

- **AI-Powered OCR** : Extract data from IDs and passports with advanced OCR, including full Arabic language support.
- **Photo Capture** : Capture visitor photos during check-in/out for identity verification and security records.
- **Whitelist & Blacklist** : Control access by approving trusted visitors & blocking unauthorized.
- **Easy Check-In/Out** : Fast, secure registration and exit with full logging of visitor activities and time stamps.
- **Printable & Virtual IDs** : Issue visitor badges as printed cards or digital QR codes for quick, flexible access.
- **Visitor Profiles** : Build complete digital profiles including ID data, photo, history, and attached documents.
- **Access Control & LPR** : Integrates with gates, turnstiles, and ANPR Hub license plate recognition for automation.
- **NID PDF417 Barcode** : Supports barcode scanning from Egyptian national IDs for instant, accurate check-in/out.
- **Time Attendance** : Track staff, contractors, and temporary workers' presence and working hours accurately.
- **Group Access** : Register and check in up to 10 visitors at once with group entry support.
- **Web & Mobile Access** : Manage/Check-In visitors anytime, anywhere with responsive web & mobile applications.
- **System Integration** : Connect easily with HR, ERP, or security systems for centralized management.

Practical Scenarios

Visitor Access Management

Register and track all visitors with ID scanning, photo capture, and automatic host notification.

Temporary Worker Attendance

Monitor contractors and short-term staff, log their working hours, and ensure site security.

Visitor Access with Permit

Provide secure entry using pre-approved visit permits or QR codes for compliance.

Multi-Branch Organizations

Manage staff centrally across all branches, with unified reporting in one platform.

Events & Conferences

Manage groups with group access, digital badges & fast registration

Corporate Offices

Streamline visitor check-in, reduce waiting time & keep records for audits.

Banks & Financial Institutions

Secure access with whitelist & blacklist

Hospitals & Healthcare Facilities

Control sensitive areas, manage visitors, and track staff attendance

Government & Public Sector

Secure buildings with ID checks, access control, and permits

Factories & Industrial Sites

Track workers, contractors & suppliers while ensuring safety compliance.

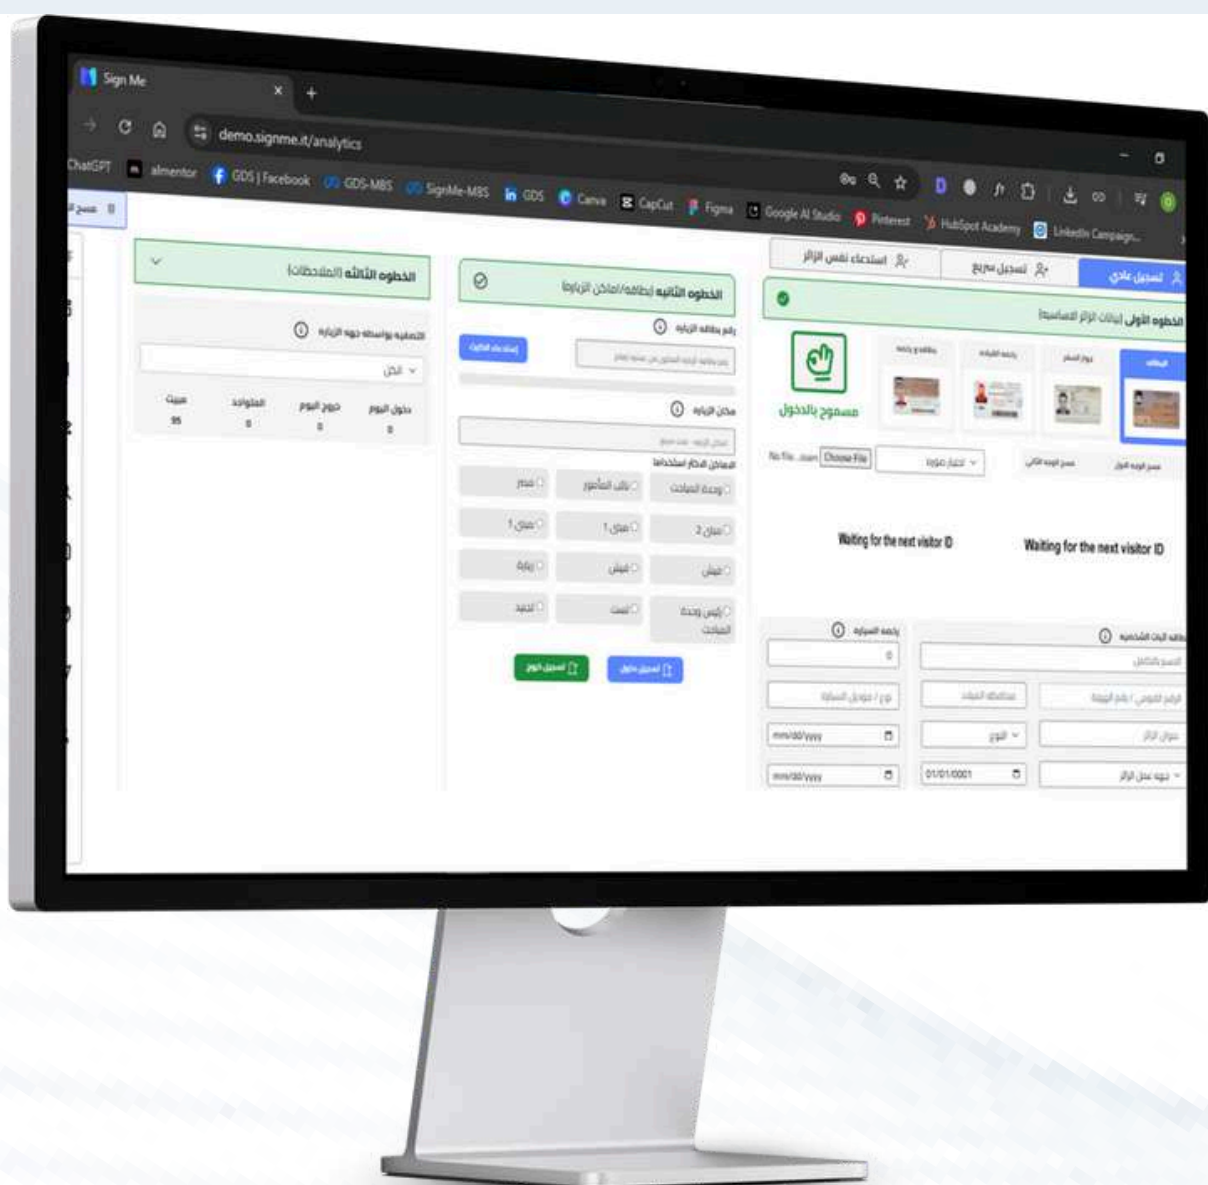

Hotels & Hospitality

Register guests digitally, integrate access, boost security.

Educational Institutions

Manage students visitors, staff, and contractors with accurate logs

Value Delivered

- Stronger Security & Faster Check-In with ID, OCR, and barcode
- Professional Image & Centralized Control on one platform
- Smarter Compliance & Real-Time Awareness with alerts.
- Flexible Access & Seamless Integration via badges & QR.
- Better Decisions & Cost Savings through automation
