

ANPR Hub

Product Catalog

Car color: Silver

Car plate: مصر ر 1

Brand: BMW

Model: E90 -2015

About ANPR Hub

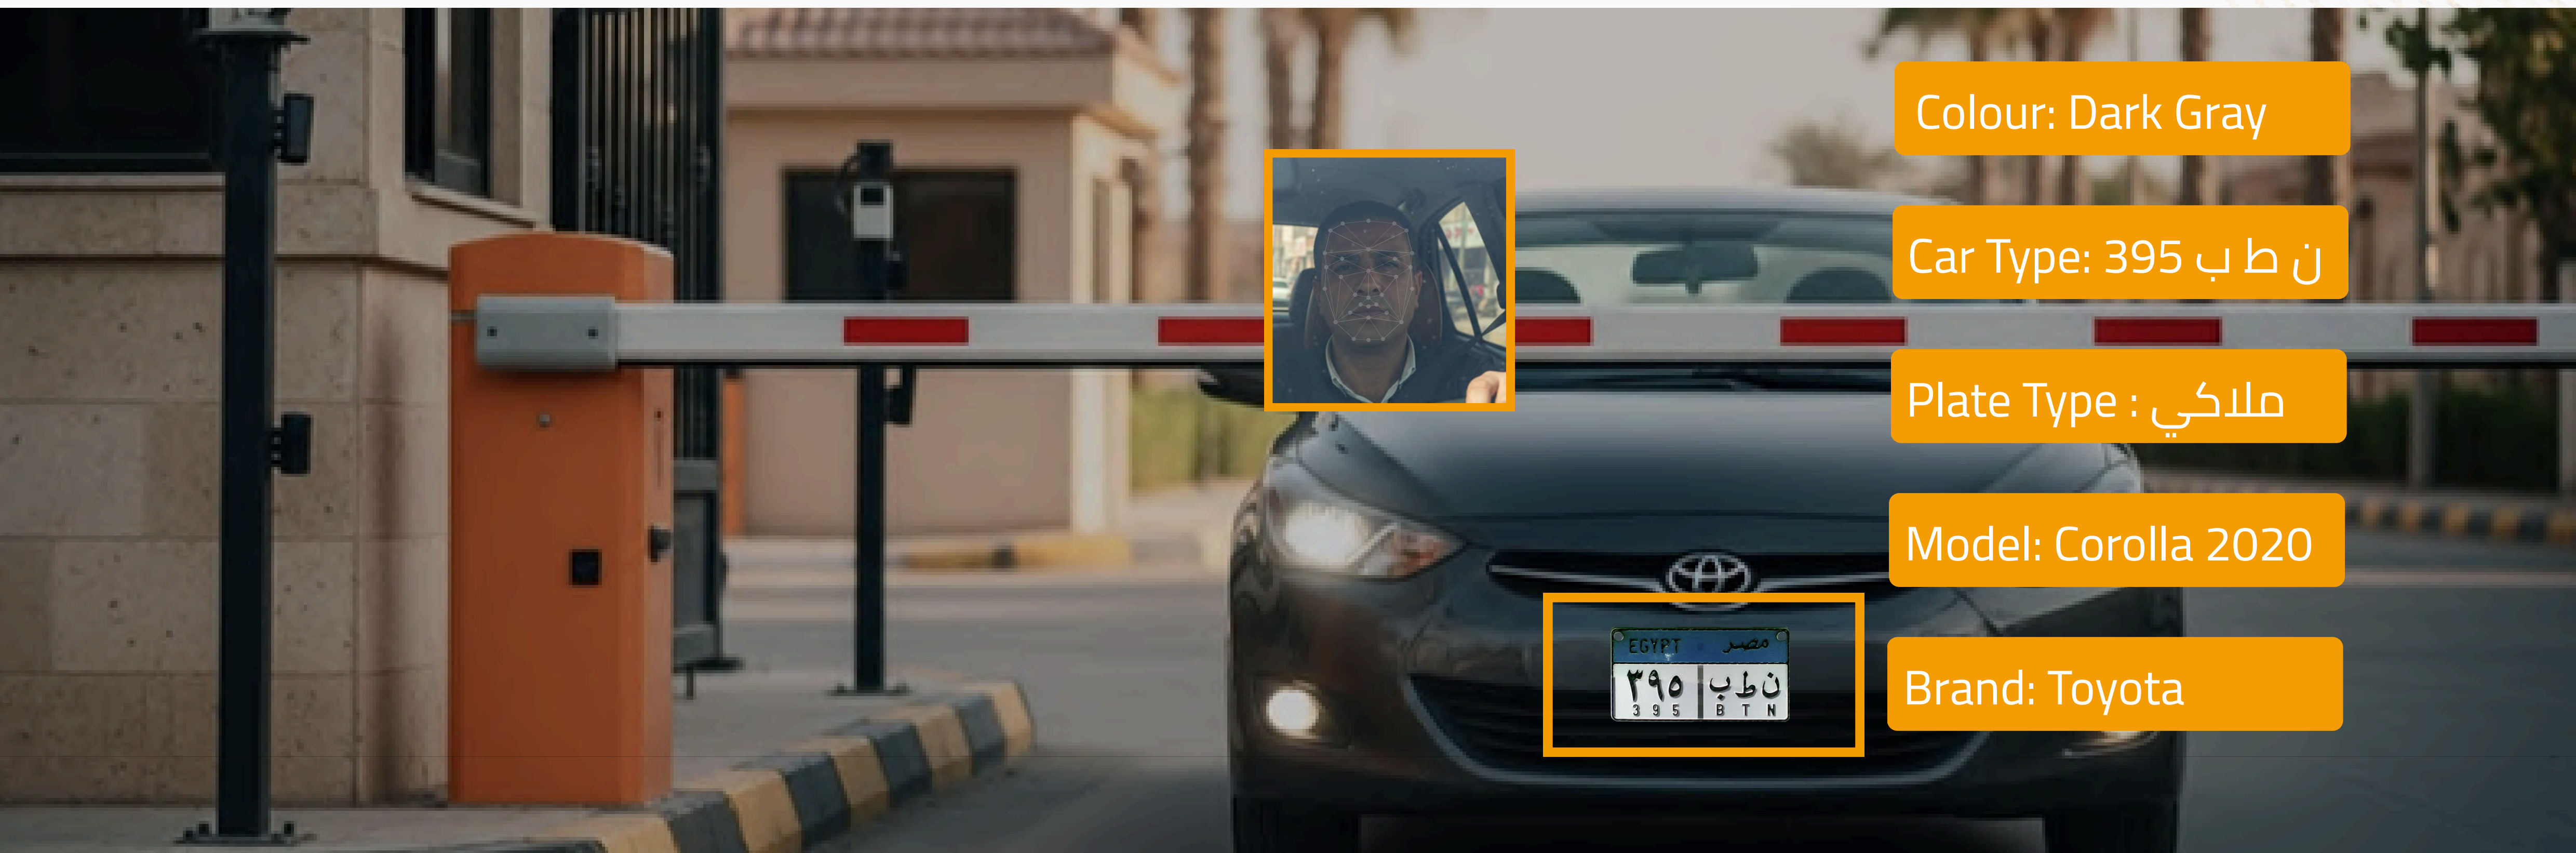

ANPR Hub is an advanced License Plate Recognition platform designed to bring intelligence and automation to vehicle access control. Available in **PREMIUM, LITE, and SDK/API** editions, it adapts to any scale, from small facilities to enterprise-level deployments

Works with any IP camera

Auto recognition & access

Integration with existing systems

ANPR Hub empowers organizations to streamline access management, enhance security visibility, and make data-driven decisions with speed and accuracy.

Colour: Dark Gray

Car Type: ن ط ب ٣٩٥

Plate Type : ملاكي

Model: Corolla 2020

Brand: Toyota

Why Choose ANPR Hub

Turn your **IP CCTV cameras** into smart LPR nodes or utilize our dedicated LPR cameras for enhanced accuracy, gaining instant control, reduced manual work, and a more secure, efficient environment.

Designed for Real-World Performance

From **residential complexes, airports, shopping malls, or industrial zones**, it ensures instant recognition, fast response, and reliable operation even in challenging conditions.

What Makes Us Different

What sets us apart is the precision, speed, and seamless integration **Our ANPR Hub** combines intelligent recognition, automated control, and reliable performance in one powerful platform

Accuracy that Empowers

With up to **99% recognition accuracy**, our platform ensures every plate is captured correctly delivering unmatched reliability, precise data, and total confidence in every operation

Product Editions at a glance

Three editions built for every scale

PREMIUM

Advanced solution for large-scale sites

- Access control with whitelist/blacklist
- Web portal and detailed reports
- Supports Unlimited Cameras

LITE

Essential features for small deployments

- Instant entry and exit alerts
- Export reports to Excel
- Vehicle search by license plate

SDK / API

For developers & integrators

- Flexible licensing options
- REST/JSON API
- Toolkit for custom apps

What Makes ANPR Hub Stand Out

Core functions that power ANPR Hub's intelligent recognition

Turn Your IP camera into LPR

Connect any CCTV IP camera and run LPR with no special hardware required.

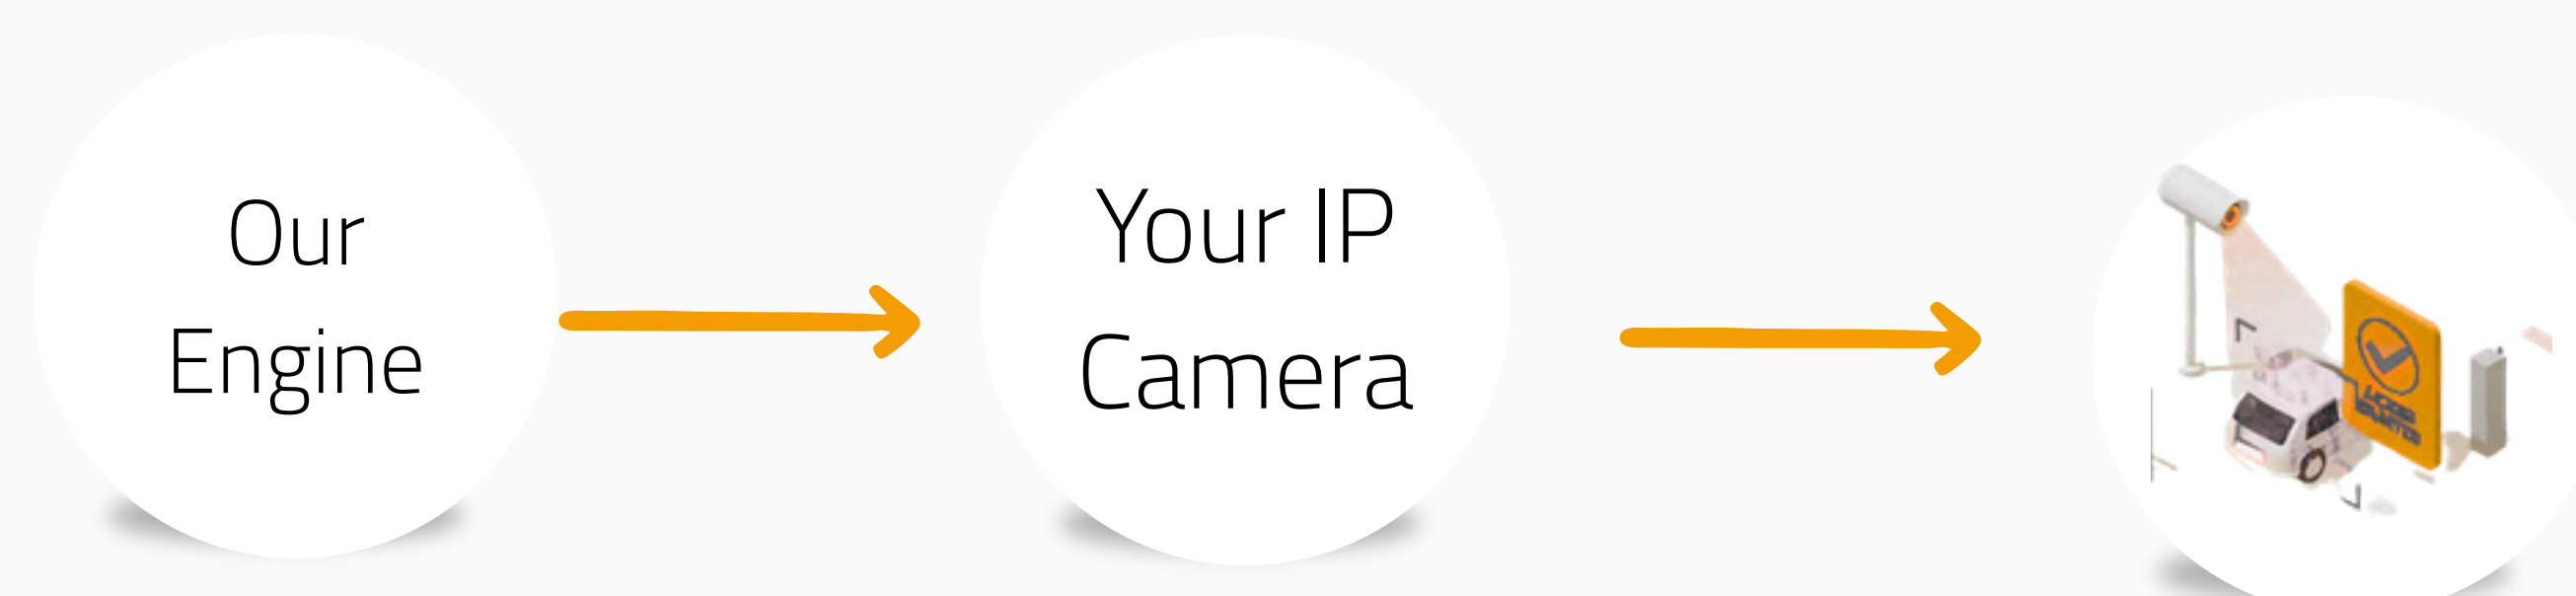

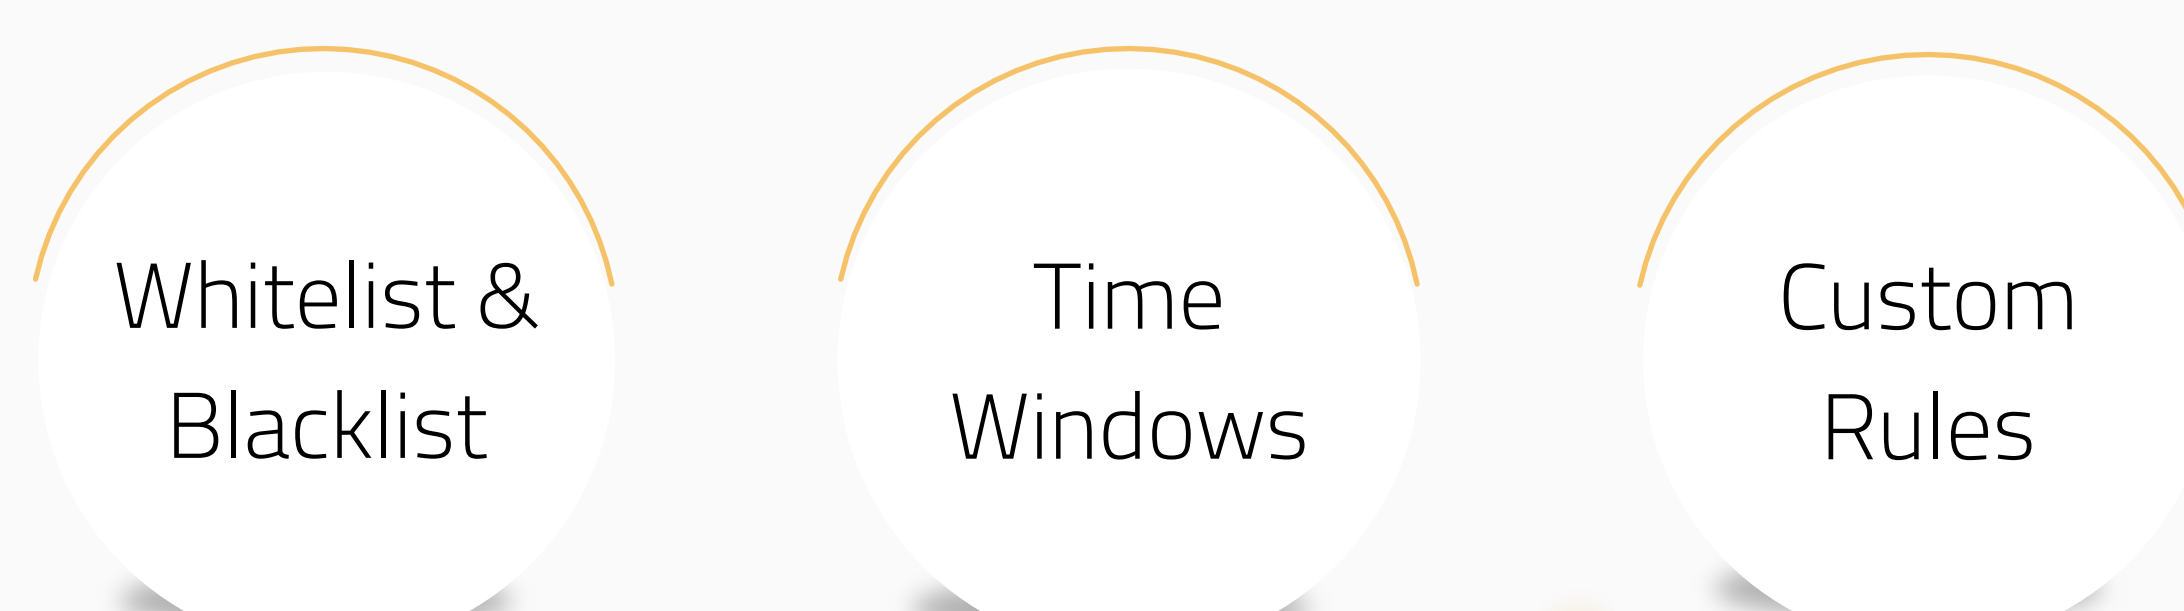

Plate Type Detection

Classify vehicle plate type instantly (private, taxi, bus, truck, motorcycle, government plates, etc.).

Gate & Barrier Control

Automate gates and barriers using LPR results whitelist/blacklist, time windows, and custom rules.

Dedicated LPR Cameras

Use our optimized LPR cameras for demanding scenarios low light/night, high speed, and reflective plates.

Low Light & High Speed

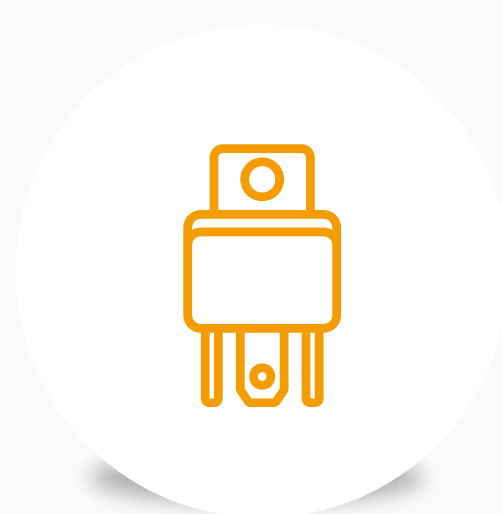

Reflective plate

Real-time Alerts & Actions

Instant API callbacks, relay triggers, SMS/email alerts, and integrations with third-party systems.

API callbacks

SMS/email alerts

Integrations

Searchable History

Full audit trail with plate image, time, camera, and location.

Flexible Deployment

Cloud SaaS, local edge nodes, or hybrid architecture.

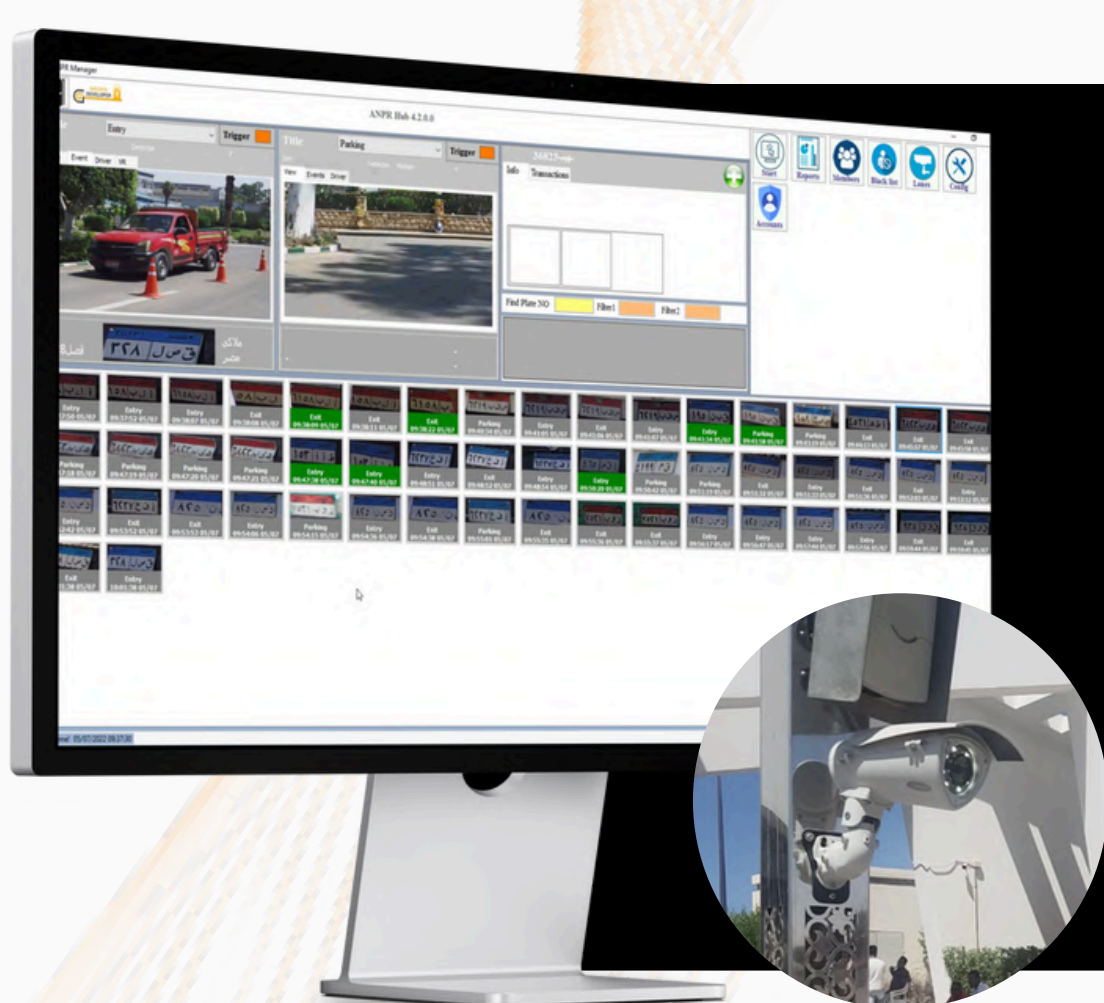

Multilingual UI

English, Arabic and customizable labels.

GDPR & Privacy Ready

Data retention and anonymization controls.

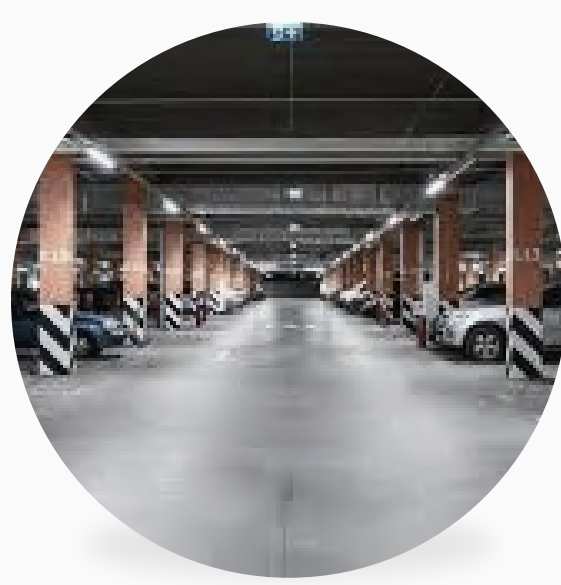

What You Really Gain

- ✓ Unmatched accuracy ensures reliable recognition under any condition, speed, light, or weather
- ✓ Smart automation allows gates and access points to operate flawlessly with zero manual effort
- ✓ Full visibility provides complete insight, with every event logged by time, image, and location
- ✓ Flexible by design, the system adapts seamlessly to cloud, local, or hybrid environments
- ✓ With its privacy-ready architecture, your data stays secure, compliant, and fully protected

The Story Behind Smarter Access

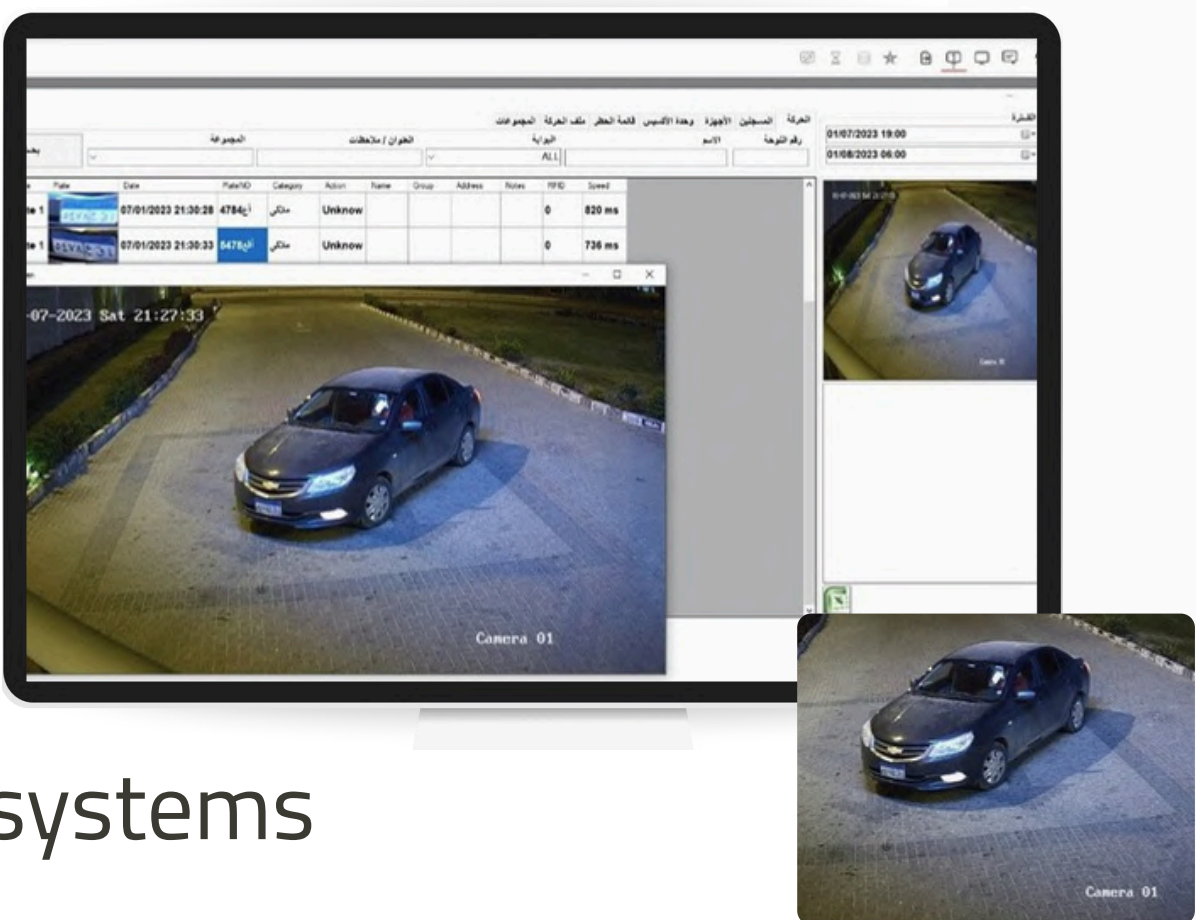

Integration, Performance & Reliability Working Together

ANPR Hub integrates effortlessly with your existing setup, **connecting any IP camera** (RTSP, ONVIF, HTTP upload, or video files) and **allowing you to start recognizing plates instantly**.

Outputs are flexible: REST/JSON API, webhooks, MQTT, SQL export, or S3 storage. **Gate control** is supported via digital I/O, controller integrations, or software API triggers.

Works seamlessly with: existing VMS, parking management platforms, visitor systems (example, **SignMe / ParkMe**).

SDK: Windows, Linux, and Docker support for embedded or server deployments.

Implementation, Security & Plans

Simple Setup

- ✓ Connect your existing IP cameras.
- ✓ For high-speed or low-light sites, use
- ✓ our optimized LPR cameras.

Gate control via relay, TCP/IP controller.

Includes quick-start kit with mounting guide & optional on-site tuning

Built-in Security

- ✓ Role-based access & secure API (HTTPS).
- ✓ Smart data retention & automatic cleanup.
- ✓ Privacy filters to blur faces.

On-prem deployment available

Flexible Plans

- ✓ **LITE** — affordable monthly per-site plan.
- ✓ **PREMIUM** — enterprise-grade.
- ✓ **SDK / API** — developer license.

Choose what fits your operation best
